

WORLDWIDE FISTULA FUND

HEALING WOMEN, RESTORING LIVES

Exciting updates and our doctors' latest trip!

We still have an epidemic of women suffering chronic effects of traumatic childbirth.

We have adapted our mission to include women's health issues more common than fistula, such as [pelvic organ prolapse](#).

Preventing Childbirth Injuries

Your support helped train 84 medical students, residents and faculty in Ethiopia in June! Thank you!

Dr. Nardos, and partner OHSU, provided training for WFF's Urogynecology Fellows at Mekelle University, while healing 42 local women with surgery.

[See photos from her trip!](#)

In June, Drs. Wall, Payne, Nardos, and Spitznagle lead our Mekelle Medical Education Collaboration providing enhanced Obstetrics & Gynecology.

Exploring Burkina Faso

Dr. Itengre, our DFC Niger surgeon, has announced his return home to Burkina Faso after 2016. He wishes to serve women and girls of his home country. Our research indicates the needs of women with fistula and quality women's health care in Burkina Faso. We are currently researching a potential launch of services there and will keep you updated.

Help us get a top rated badge!

We need just 10 4+ stars reviews by October 31st to get on GreatNonprofits top-rated list for 2016! [Share what you love about WFF!](#)

Thanks for all of your support!
